Practical Assignment3

QUESTION:1

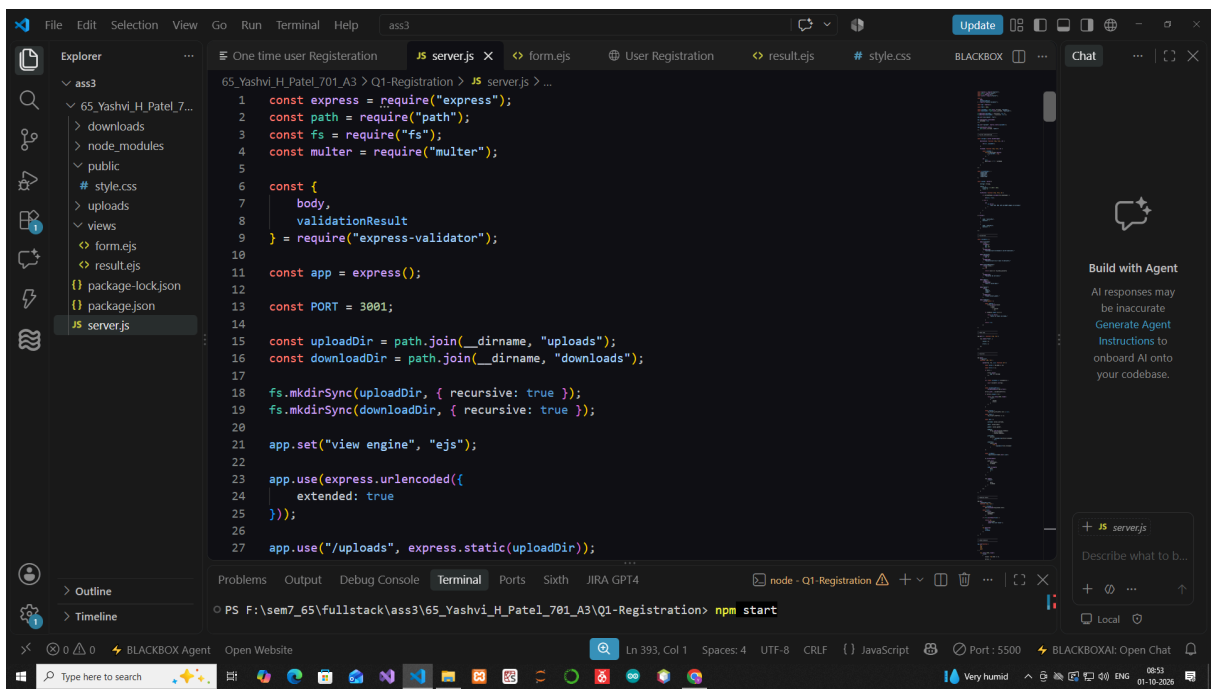

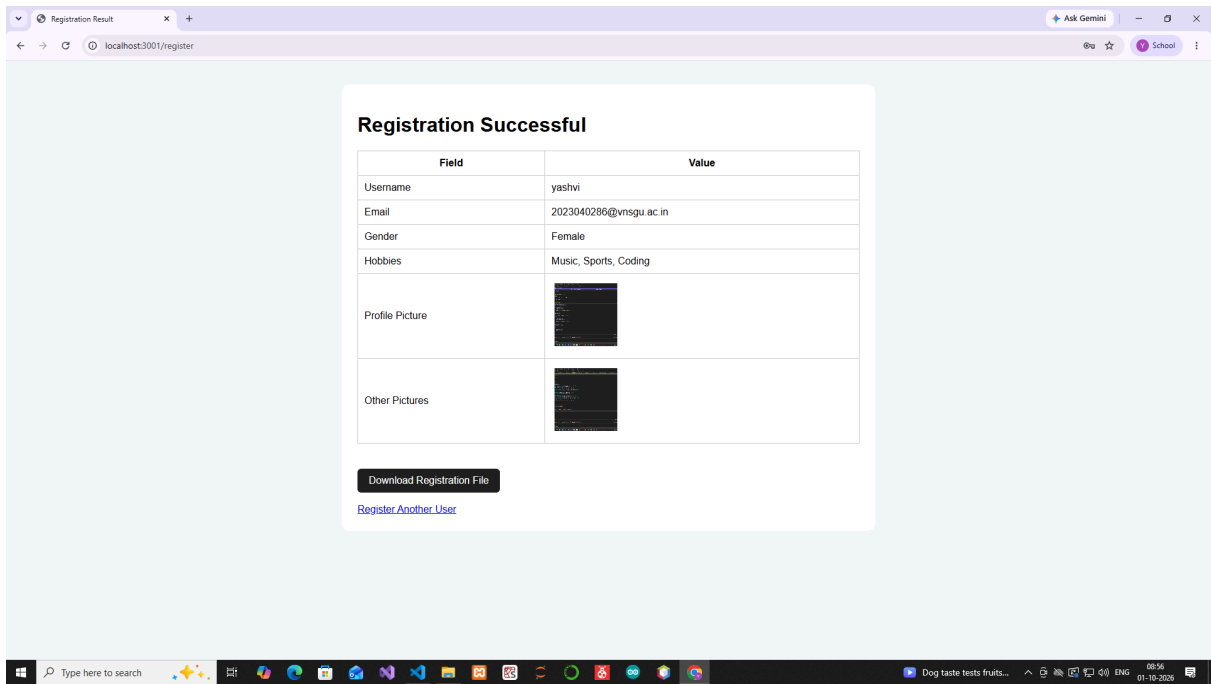

Develop a user registration form (fields: username, password, confirm password, email, gender, hobbies, upload profile pic, upload other pics) (use text box, radio, checkboxes, file upload) using Express. Form should also contain file upload (single, multiple) with validations.

- In case of invalid data, display errors along with all previous field values.
- In case of all valid fields, display all data and images in a well formatted tabular form. and allow the user to download that file using Express. Develop route for file download.

(Use express, ejs, express-validator)

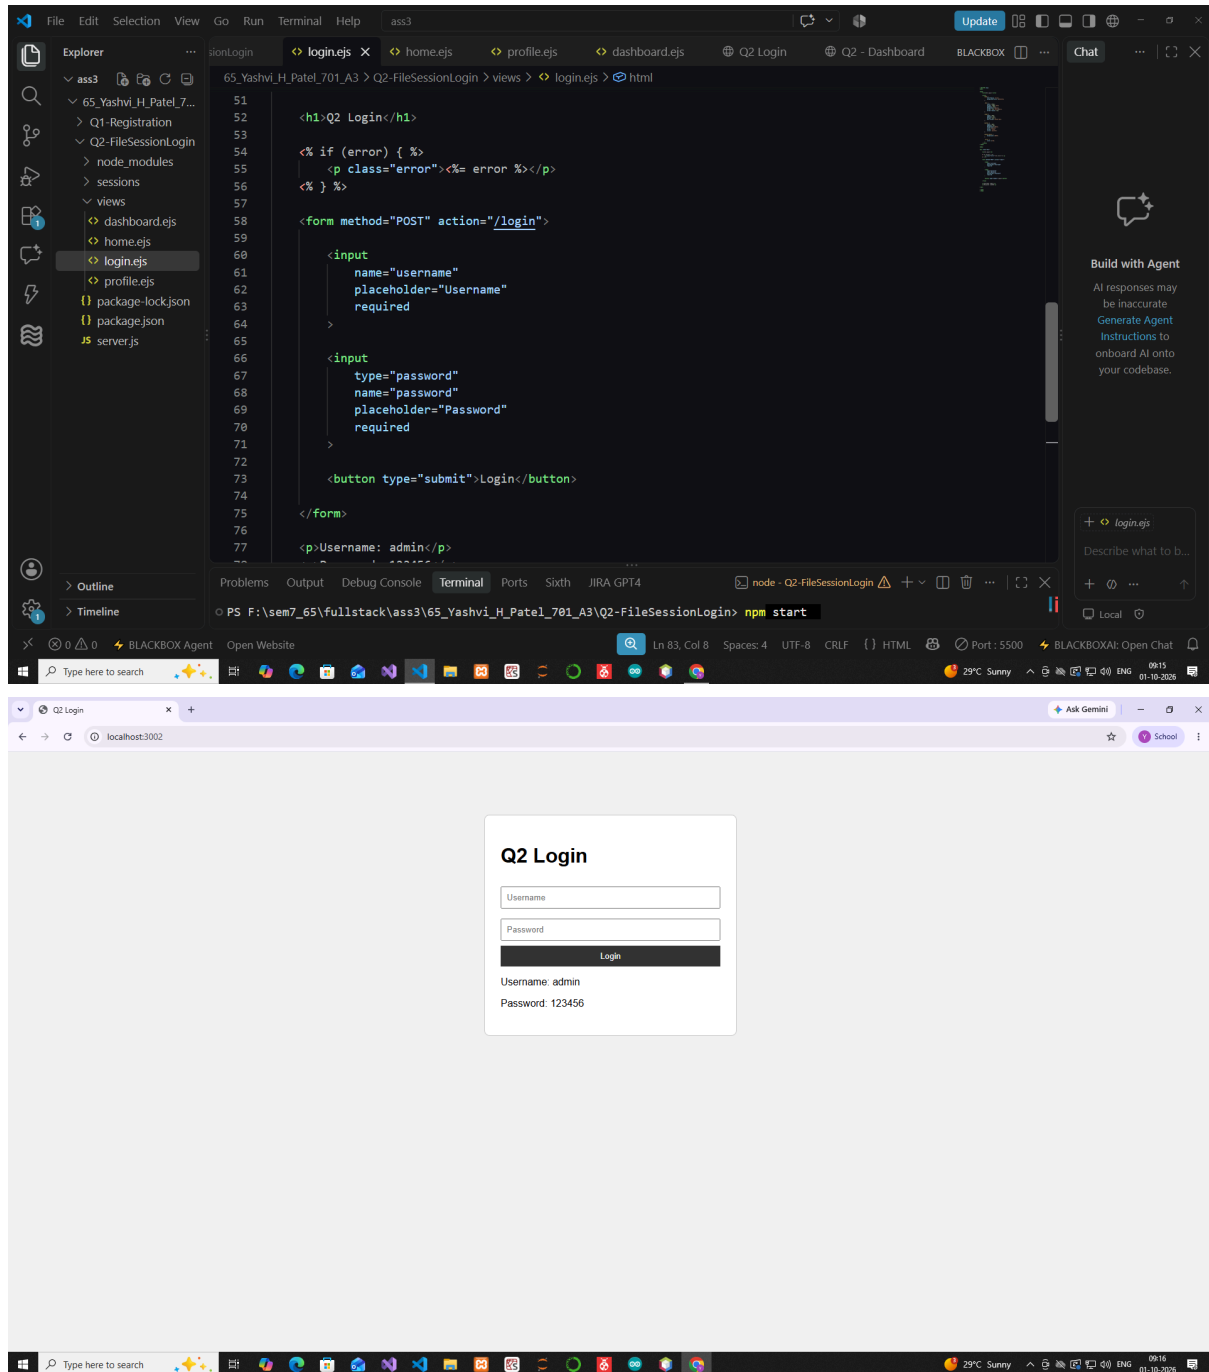

The screenshot displays a web browser window with the title 'User Registration' and the address bar showing 'localhost:3001'. The main content is a 'User Registration Form' with the following fields and options:

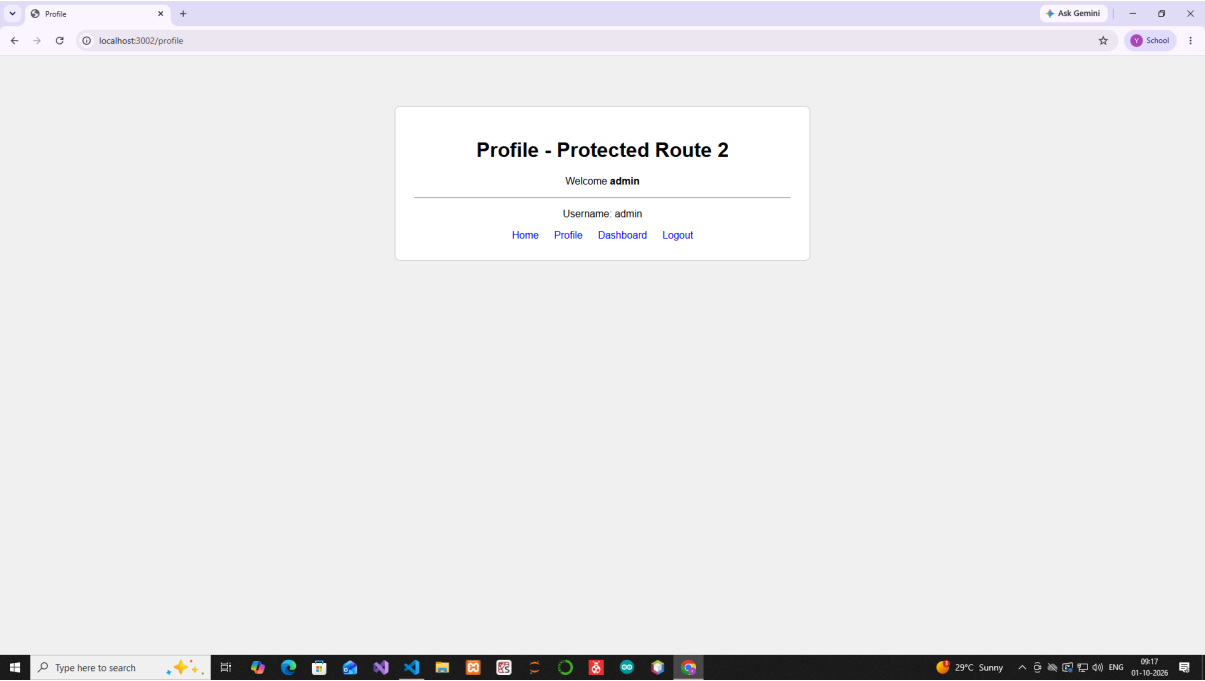

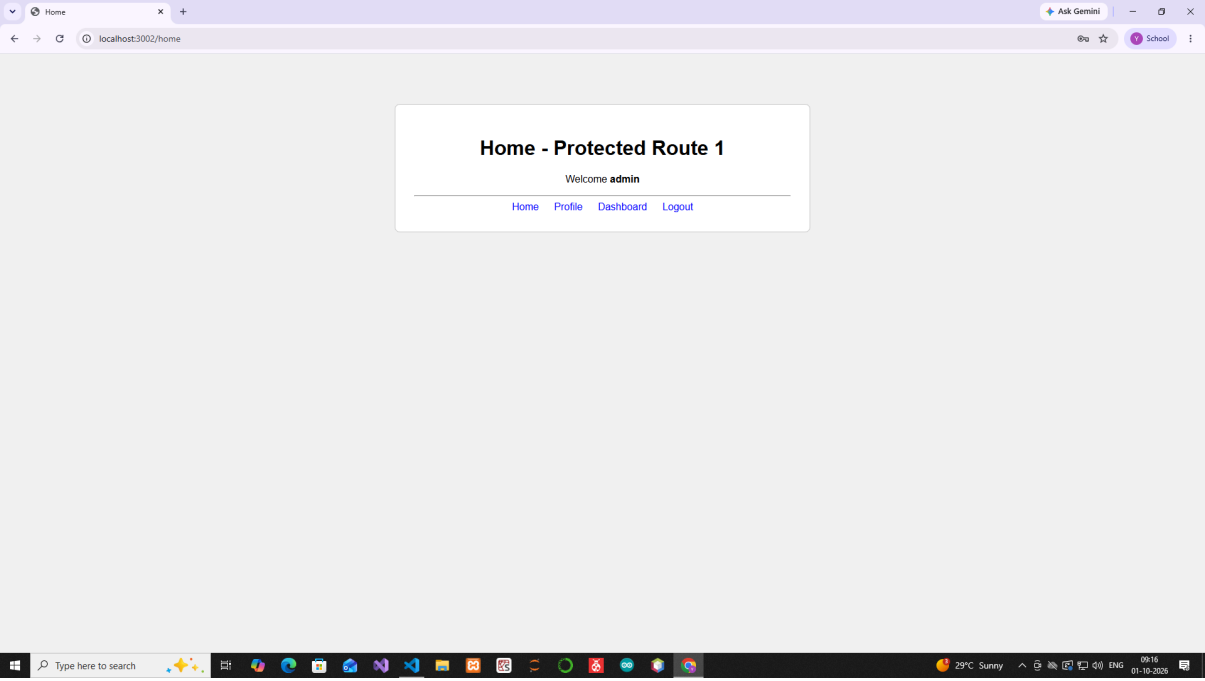

- Username:** A text input field containing 'yashvi'.
- Password:** A password input field with masked characters '.....'.
- Confirm Password:** A password input field with masked characters '.....'.
- Email:** A text input field containing '2023040206@vnsu.ac.in'.
- Gender:** Radio buttons for 'Male', 'Female' (selected), and 'Other'.
- Hobbies:** Checkboxes for 'Reading', 'Music' (checked), 'Sports' (checked), and 'Coding' (checked).
- Profile Picture:** A 'Choose File' button and a preview of 'Capture11.PNG'.
- Other Pictures:** A 'Choose Files' button and a preview of 'Capture10.PNG'.
- Register:** A dark button at the bottom of the form.

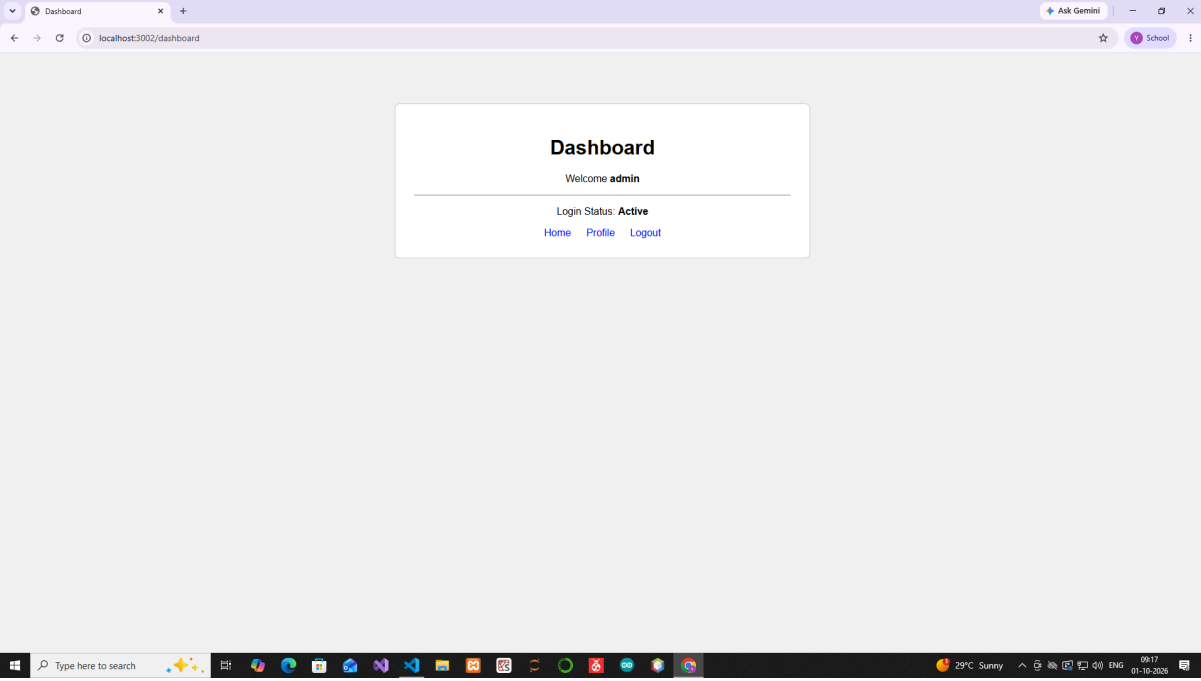

QUESTION:2

Express Login application with file session store. Functionalities are login, 2 protected routes, Logout.

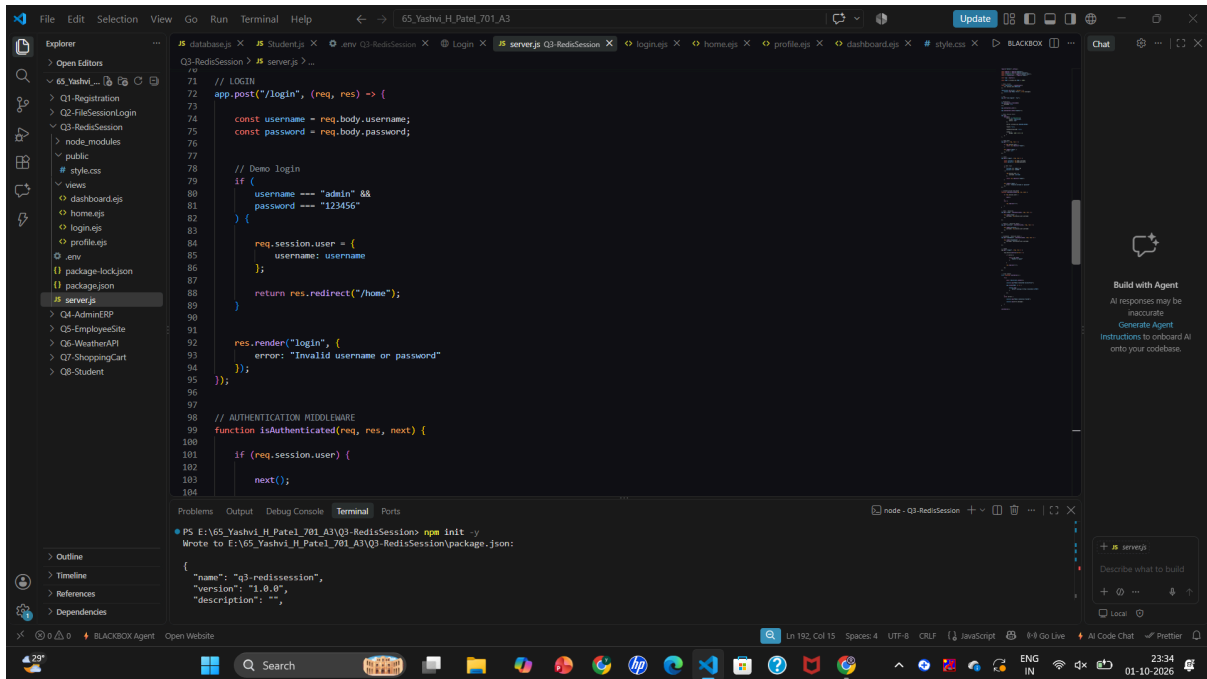

QUESTION:3

Express Login application with redis session store. Functionalities are login, 2 protected routes, Logout.

The screenshot shows a VS Code editor with the following code in `server.js`:

```
// LOGIN
app.post("/login", (req, res) => {
  const username = req.body.username;
  const password = req.body.password;

  // Demo Login
  if (
    username === "admin" &&
    password === "123456"
  ) {
    req.session.user = {
      username: username
    };
    return res.redirect("/home");
  }

  res.render("login", {
    error: "Invalid username or password"
  });
});

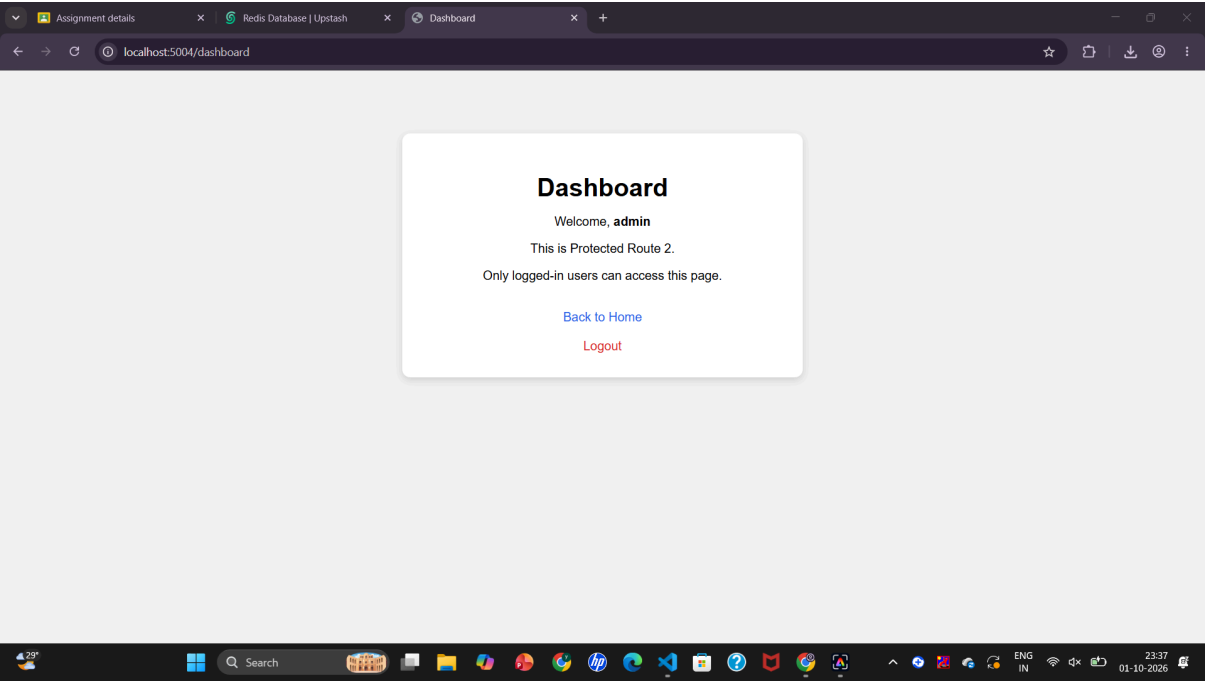

// AUTHENTICATION MIDDLEWARE
function isAuthenticated(req, res, next) {
  if (req.session.user) {
    next();
  }
}
```

The terminal at the bottom shows the command `npm init -y` and the resulting `package.json` file:

```
{
  "name": "q3-redisession",
  "version": "1.0.0",
  "description": "",
  "main": "server.js",
  "scripts": {
    "start": "node server.js"
  },
  "keywords": [],
  "author": "",
  "license": "ISC"
}
```

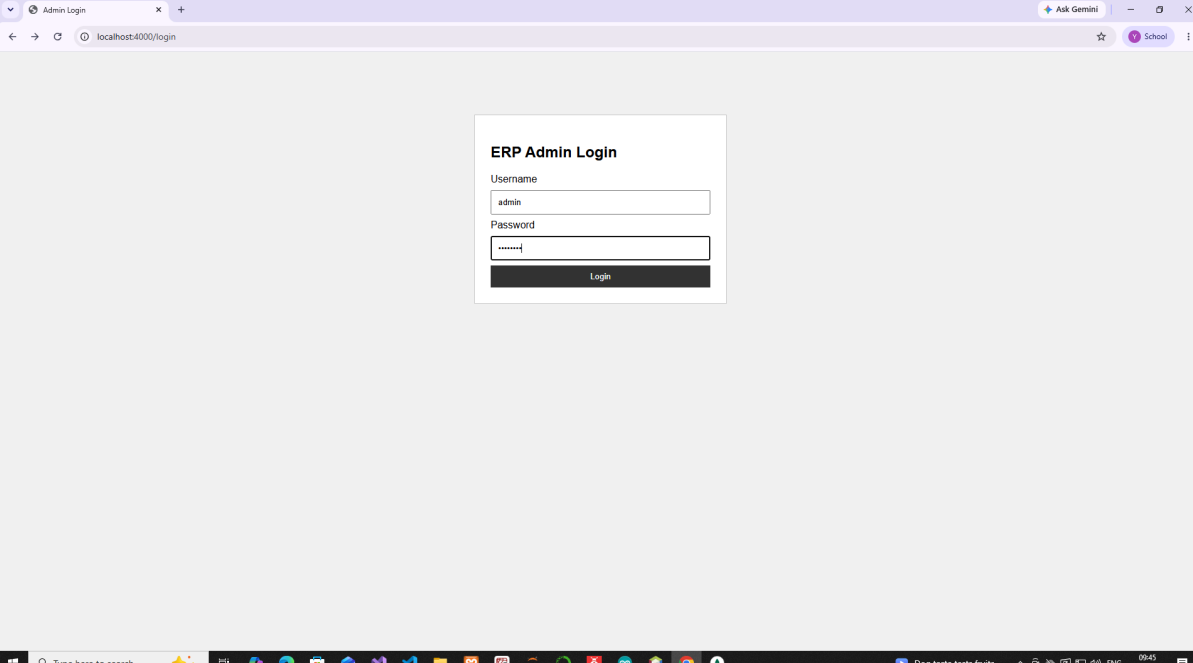

QUESTION:4

Develop login for an ADMIN panel of ERP system with session, CRUD operations for employees table (generate empid and password) with salary calculation with mongoose, express and EJS template engine. Send email to employee when inserted. Encrypt the password. Logout
